

Chief Technology Officer and Co-Founder

DigitalDataFactory / sportsplatform.de

Be the ONE to build the future of Entertainment !

The Role

We are building an amazing B2B SaaS platform for modern Entertainment businesses, Sports Club's and Leagues. Our founding team consists of industry experts with more than 20 years' experience in the Sports, Media, IT and Entertainment business. Our vision is to "Build the future of Entertainment" with an Data driven and AI focused cloud platform.

In partnership with our founders the role focuses on building the platform on public cloud infrastructure. Together with our partners at Microsoft and Google we expect our CTO to envision, architect, develop and build the platform using modern technologies and leveraging cloud services from these vendors. In addition, the Chief Technology Officer is responsible for building and leading a team of highly technical experts and thought leaders to drive industry digital transformation forward.

Our **Chief Technology Officer and Co-Founder**

is responsible to envision, develop, architect and build our core platform.

The role requires an excellent strategic leader with vision, collaborator and communicator (verbal and written), able to present insights in concise and effective manner to a variety of stakeholders. You will need to demonstrate deep technical knowledge to be able to articulate our technical strategy, competitive differentiation and core value propositions of our platform and technologies.

- The primary responsibilities include – Envision, develop, architect, and build our core platform.
- Build highly technical capabilities and skills across our tech team, and ensure first-class development. Foster a culture of excellence that attracts world class talent.
- Actively participate in community work. Demonstrate and share best practices.
- Establish strong relationships with Microsoft and Google technical teams to facilitate high impact interactions and to deliver strong results.
- Display exceptional integrity and executive presence in dealing with both internal and external senior leaders

Experiences Required:

- Real passion for technology, incl. knowledge of application development practices
- Strong technical know-how in Cloud Technologies (Azure, AWS, GCP) and DevOps
- Deep understanding of ETL, Datalake, TensorFlow, ML and Deep Learning technologies
- A plus would be understanding of Python, R and Kubernetes
- Keen analytical skills that enable resolution of complex business and technical issues.
- Strong interpersonal, verbal, and written communication skills
- Good decision-making skills, conflict resolution, and follow through with customers and partners

Chief Technology Officer and Co-Founder
